How does a solar well pump work?

Sensors are another integral part of the pump's operation. Placed in the water of the well, and in the residential water tank, they effectively instruct the solar well pump setup as to when the water tank requires more water from the well, and when the well requires time to naturally refill, before it can be mined again for water.

With Solar Pumps there are no ongoing operating costs as you are relying on the sun to power your pump. The cost of a solar pump depends on the size of the pump and the number of solar ...
