Does Ottawa have a wetland?

While wetlands in the rural west have lost provincial protection, the City of Ottawa's move to evaluate wetlands near a big future development has led to a newly designated South Bear Brook wetland. The audio version of this article is generated by AI-based technology. Mispronunciations can occur.

How much wetlands have been lost in Ottawa?

In our most urban areas such as downtown Ottawa, that loss is as high as 73%. The RVCA looks for opportunities to restore and construct wetlands in areas where the hydrological system has been damaged.

What's going on with Ottawa's wetland designations?

We are working with our partners to continually review and improve the results. In one of the biggest wetland designations the City of Ottawa has completed in recent years, 561 hectares of swamp and marsh near the future Tewin project are now protected as provincially significant -- meaning they can't be developed or disturbed.

Will a solar project take off in Ottawa?

Several people who spoke to CBC and Radio-Canada say they expect solar projects to take off as the technology becomes increasingly cost-effective. (Francis Pepin/Radio-Canada) Four solar panel projects in Ottawa have received the go-ahead from city council, and experts and advocates believe more could soon follow.
