The dynamic price mechanism can thoroughly explore the potential of the flexible load in participating in peak shaving and valley filling compared with the conventional fixed ...

To enhance peak-shaving and valley-filling performance in residential microgrids while reducing the costs associated with energy storage systems, this paper selects retired ...

This study aims to review the potential benefits of peak load shaving in a microgrid system.

Therefore, a microgrid based on vanadium redox flow battery is studied for rural applications in this paper, in which biomass gasification and solid oxide fuel cell are integrated ...

In this study, a model for energy planning of an MMG system focusing on peak shaving and valley filling has been proposed. Each microgrid in the system is capable of ...

(1) This article uses battery energy storage system for peak shaving and valley filling in microgrids, studies the role of battery energy storage system in microgrids, and ...

In this paper, we focused on an electric vehicle charging/discharging (V2G) (Vehicle to grid) energy management system based on a Tree-based decision algorithm for peak shaving, load...

To address this issue, this paper proposes a real-time pricing regulation mechanism that incorporates source, load and storage agents into regulation. This mechanism ...
