If you have not found a budget-friendly container house supplier, you can contact K-HOME to learn about your affordable container house construction and project management in the Philippines. K-HOME is your trusted container house supplier in the Philippines.

How to design a container house in the Philippines?

The following are the steps to plan and design a container house in the Philippines. The first and most important step is to consider your planned land area and container house footprint, and then imagine how you want to arrange the interior/exterior of the container house in the Philippines.

How much does a 20 foot container cost in Philippines?

Buying a 20-foot second-hand container will cost about 85,000 Philippine pesos, which is about US\$1680. The cost of a new 20-foot container truck may be approximately PHP 180,000 to PHP 250,000 (US\$4,000 - 5,600). However, when building shipping container houses, 20-foot containers are usually used as a supplement to 40-foot containers.
