-----

It includes all the best features of a rotary power system making it the ultimate in power protection. The Series MC provides 25kVA to 400kVA of clean, conditioned, uninterruptible ...

To get uninterruptible and continuous power supply, a diesel-generator back-up system is needed along with a fuel supply plan that includes on-demand replacement.

It transfers the kinetic energy stored in the flywheel to the generator, so guaranteeing an uninterrupted supply of power. The flywheel is available ...

Learn more about Dynamic / Rotary UPS from Cummins, Inc., an industry leader in reliable power solutions for more than 100 years.

Suitable for protection against sags, brownouts, momentary interruptions & short power outages.

Rotary UPS" use a series of flywheels which convert electrical energy into kinetic energy and store it within the flywheel. In the event of a power cut, the stored energy is converted back into...

Rotary UPS has a low redundancy, typically 15-30 seconds, thus it is often coupled with a diesel generator to support loads for extended periods of time. It is applicable ...

A Diesel Rotary Uninterruptible Power Supply (DRUPS) integrates a diesel engine, flywheel, and generator to deliver instant, battery-free backup power with no ...
