What is solar control glass?

Solar control glass can also have different levels of reflectivity to provide transparency or a more reflective, almost mirrored glass effect, as well as a changing appearance during the day, to meet your aesthetic needs. There are many products available to choose from.

Can solar control glass be colored?

Our solar control glass is applied on clear float glass and has a neutral aspect, allowing more natural, truer views through the glass. However, if you wish, solar control glass can also be colored. Our solar control coatings can be applied on tinted glass to further help mitigate glare and solar heat gain.

Can solar control glass reduce glare?

Solar control glass can help mitigate glare from the sun and increase the visual comfort of building occupants, particularly if a glazed facade is directly exposed to the sun and with a high window-to-wall ratio.

How much solar energy does low-E glass block?

Contact your Architectural Rep. Find Yours Solarban 60 Solar Control Low-e Glass blocks 62 percent of solar energy while allowing 70 percent of visible light to pass through.

Solarban®; R100 glass is a neutral-reflective low-e glass with an excellent solar heat gain coefficient (SHGC). Solarban®; R100 glass provides significant improvements in solar ...

SOLARBAN®; 70 Low-e window glass by Vitro, formerly PPG, provides clear and comfortable solar control letting in natural light while blocking heat energy.

With its ability to block 60% of solar energy while allowing 70% of visible light to pass through, Solarban®; 60 glass can help you provide year-round ...

Our solar control glass is applied on clear float glass and has a neutral aspect, allowing more natural, truer views through the glass. However, if you wish, solar control glass can also be ...

SOLARBAN®; 70 Low-e window glass by Vitro, formerly PPG, provides clear and comfortable solar control letting in natural light while blocking heat ...

Solar Reflecting Coating How Is Solar Control Measured? Solar Heat Gain Or "G" Value Light to Solar Heat Gain (Lshg) Or Selectivity Insulated Glass Unit Solar control performance is achieved through the use of a very thin, transparent, and permanent coating that helps limit the solar energy entering inside. It helps control solar gain to various levels depending on the coating while allowing natural daylight in and views on the outside. See more about how glass is coated. See more on guardianglass Missing: rpg Must include: rpg Pilkington Solar Control - Pilkington Pilkington Eclipse(TM) Silver is an on-line coated, highly reflective solar control glass offering good light transmittance, medium solar control with an ...

Thanks to its balanced, reflective visual quality, Solarban® R77 glass is ideal for realizing facade and curtainwall designs intended to capture the visual ...

An energy modeling study conducted by an independent energy design and consulting firm showed that architects and building owners can potentially save millions of dollars during a ...
