The Energy Market Regulatory Authority (EMRA) approved a 35-gigawatt-hour (GWh) capacity allocation for grid-scale storage projects, with an estimated investment of \$10 billion. Timeline: ...

Summary: Solar energy storage systems are revolutionizing renewable energy adoption. This article explores Sanaa's advancements in solar battery technology, their applications across ...

Imagine a bakery that only makes bread when the sun shines - that's solar energy without storage. This power station acts like a giant battery, storing sunshine for cloudy days and ...

This battery storage project is co-located with the coal-fired Kilroot power station in order to optimise its efficient operation. This project is fully commercial and creates no additional cost ...

To accelerate the shift to renewable energy, PowerX is committed to delivering energy storage solutions, a quintessential part of the new power infrastructure, as well as creating a symbiosis ...

Somalia's Ministry of Energy and Water Resources has launched a significant tender for a large-scale hybrid solar and battery energy storage project in northeastern Somalia. [pdf]

Romanian transmission system operator Transelectrica has announced a tender for a battery energy storage project with a 35MW power output and 70 MWh storage capacity. [pdf]

The newly launched energy storage program will help the Kingdom get 50% renewable energy in the energy mix by 2030, enhancing the reliability and resilience of the electric power system.
