Senelec, the national electricity company in Senegal, has signed a 20-year Capacity Change Agreement with a private company for ...

OverviewElectricity productionElectricity sectorElectricity demand and supply gapsSenegal's major source of electricity is diesel. The rest is mostly coal and hydroelectricity. Renewables should make up 30% of the country's energy mix and the wind farm in Taïba Ndiaye will supply half. The planned energy mix aims to help Senegal move away from oil dependence, although newly discovered gas reserves offshore are expected to be used domestically to repl...

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. ...

Senegal is adding battery storage to its national power grid as part of efforts to stabilise electricity supply and avoid blackouts.
