Who is Slovak solar?

Slovak Solar s.r.o. is a leading photovoltaic wholesaler in Slovakia, Czech Republic and Austria, with a vision to create a sustainable energy future. We started our journey in 2009 with the main idea - to provide companies specialised in the installation of solar systems with access to first-class photovoltaic products, all from one place.

Why should you choose Slovak solar?

At Slovak Solar, we believe that progress comes from constant innovation. From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV).

What is BIPV & how does it work in Slovakia?

From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV). We led the way with the first-ever 400kWh Battery Backup System, even before container-based battery systems became mainstream.

Mono-Crystalline 10W Solar Panel Technical parameter Maximum Power (W) 10W Optimum Power Voltage (Vmp) 17.56V Optimum Operating Current (Imp) 0.58A Open Circuit Voltage ...

Why choose AGORA panels? AGORA photovoltaic modules are characterized by high durability and top quality. They are manufactured in Slovakia, according to the strictest European ...

Company profile for solar panel manufacturer Agora Solar A.S. - showing the company's contact details and products manufactured.

This document specifies the parameters for a 10W mono-crystalline silicon ...

This document specifies the parameters for a 10W mono-crystalline silicon photovoltaic module. The module has a maximum power production tolerance of +/- 10% at 10W, with a maximum ...

Specification for 10W PV Module (Test condition: 1000W/m², AM1.5, 25°C) ... specified within (25) years from the date of delivery, And 2 year warrantee on workmanship

Our experts will draw up technical documentation for your projects, which will give you all the details for the correct implementation ...

Key specifications to consider when evaluating solar panels are the wattage or power rating, efficiency percentage, operating voltage, current output, and the temperature coefficient that ...
