What is the current energy use and state of renewables in Slovenia?

Current energy use and state of renewables in Slovenia. 2050 scenario based forecast of energy use for industry, transport and other use. Slovenian characteristics and possibilities for the growth of renewables. Largest Slovenian potential has solar power, wood and water is over 90 % exploit. 1. Introduction

What are Slovenian characteristics and possibilities for the growth of renewables?

Slovenian characteristics and possibilities for the growth of renewables. Largest Slovenian potential has solar power, wood and water is over 90 % exploit. 1. Introduction One of the main goals of energy policy in the European Union (EU) is to gradually increase the use of renewable energy sources (RES) and also to improve energy efficiency.

How many solar power plants are there in Slovenia?

The number of solar power plants in Slovenia has increased a lot in recent years and today their total power is approximately 368 MW and cumulative production of 2.6 % electricity. From Table 2 it is clear that main contribution on predicted RES are solar power plants.

What are the RES of primary energy in Slovenia?

RES of primary energy in Slovenia are water flows, wood, other biomass energy and solar radiation. Direct use of wood biomass is fairly limited to the use in boilers and to the direct combustion.

Hidroelektrarne na Spodnji Savi (HESS) recently completed a 6 MW photovoltaic system at the Brezice hydropower plant in Slovenia, which is located on the border with Croatia.

Nestled between the Alps and the Adriatic, Slovenia has launched a 48MW photovoltaic farm in Vojnik - its largest to date. This \$35 million project demonstrates how small nations can ...

HESS invested EUR 5.5 million in the construction of the solar power plant, with EUR 750,000 provided by Slovenia's public ...

In order to explore the feasibility of a renewable hybrid energy system in highway tunnels, a scenario-coupled construction method for a highway tunnel renewable hybrid energy system is ...
