How much solar power does Slovenia have in 2024?

Slovenia deployed 298 MW of solar in 2024 and 400 MW of PV in 2023. By the end of the first half of 2025, cumulative capacity reached 1.5 GW. This content is protected by copyright and may not be reused.

How many solar panels did Slovenia install in 2025?

Slovenia installed 85 MW of solar in the first half of 2025, driven by growth in commercial and industrial (C&I) projects and utility-scale installations. The lowest total in four years reflects a sharp decline in residential installations, despite continued subsidies for residential hybrid systems.

Do solar power plants need a building permit in Slovenia?

Solar power plants with the maximum power of up to 1 MW are, according to the Decree, considered small power plants and do not require a building permit to be installed. The Decree simplifies investing in renewables and is a welcome change as procedures for obtaining building permits in Slovenia can be time-consuming. 3.

Will Slovenia adopt a new National Energy Program?

Although Slovenia has not yet adopted a new National Energy Program, steps towards its adoption such as Environmental Impact Assessment requirements have been published. These requirements will be considered during the process of the adoption of the new national energy concept as envisaged by the EZ-1.

Slovenia's HSE signs a EUR100M deal for 80 MW of new solar power plants with integrated battery storage, advancing the nation's renewable energy goals for 2050.

Slovenia's renewable energy company Moja Elektrarna has put into operation a 7 MW solar power plant in Krvavi Potok, the largest in the country, local media reported.

The goal of the call is to increase the share of renewable energy in Slovenia's energy mix in order to help the country reduce its dependence on fossil fuels and develop a reliable energy ...

Slovenia is preparing to make a groundbreaking move in renewable energy with the launch of its largest solar project to date--a 140 MW floating solar power plant on Lake ...

The Slovenian Government has approved the spatial development plan for a new 30 MW solar power project, which will be the largest solar installation in the country so far. The ...

Slovenia's renewable energy company Moja Elektrarna has put into operation a 7 MW solar power plant in Krvavi Potok, the largest in ...

Slovenia introduced a new tariff system in October, replacing peak and off-peak pricing with network charges that vary by time of day and season. Hojnik said the system ...

Slovenia installed 85 MW of solar in the first half of 2025, driven by growth in commercial and industrial (C&I) projects and utility ...
