What makes SM-Energy's SMBus batteries unique?

The same quality and engineering expertise that goes into National Power's custom battery packs goes into every one of our SM-Energy's SMBus batteries. They provide dependable power and reliable performance for everything from handheld electronic devices to medical monitoring equipment.

Why should you choose national power for your SMBus battery pack?

National Power's partnerships with many of the industry's most-trusted suppliers allow us to incorporate the highest quality components into our SMBus battery packs. These top quality components, combined with our design and engineering expertise, add up to portable power solutions that consistently surpass the competition.

What is SMBUS interface?

With SMBus Interface, you can set up protection parameters and to collect battery data through the SMBus V1.1 protocol right from the SBS. There are 5 micro-LEDs installed on PCM. On/off Switch - to check estimate battery capacity status. ( approx 15% per each LED light ) Interface with PC.

Does the battery pack support two-wire SMBus V 1.1?

The battery pack supports Two-Wire SMBus v 1.1 with the interface through which the MCU can interact with it. In addition, the battery pack contains a PTC thermistor of 10 k value. The MCU can sample the voltage through the ADC to calculate its temperature.

LiFePO<sub>4</sub> Battery 24V 15Ah with SMBus Smart BMS. Max. Continuous Discharge Current: 50A; Longer Cycle Life: Offers up to 20 times longer cycle life and five times longer float/calendar ...

The battery package contains a Li-ion battery pack manager chip named bq40z50. The battery pack supports Two-Wire SMBus v 1.1 with the interface through which the MCU can interact ...

4S1P Standard battery pack RRC2054 with 14.40V / >=3.40Ah / >=48.96Whh. ...

RRC Power Solutions Smart Battery Packs are off-the-shelf batteries with worldwide certifications and approvals. These smart battery packs are able to communicate ...

With SMBus Interface, you can set up protection parameters and to collect battery data through the SMBus V1.1 protocol right from the SBS. Smart Battery System (SBS) consist of the following:
