Made up of 54 countries, Africa gets more sunshine hours than any other continent. It has some of the highest levels of solar irradiance -- the power of the sun per ...

Morocco and South Africa are building large-scale solar power installations, while Kenya and the Democratic Republic of the Congo are making use of local renewable energy ...

Discover how Africa is leading a solar-powered revolution, bringing sustainable off-grid energy to millions and driving real climate action across the continent.

With innovation in technology and falling costs, over 560 million people are already benefiting from off-grid solar, the majority of whom live ...

Made up of 54 countries, Africa gets more sunshine hours than any other continent. It has some of the highest levels of solar ...

As challenges around finance, manufacturing, and policy persist, the question remains: how can off-grid solar in Africa overcome its persistent affordability problem?

Discover how off-grid solar powered by mobile money transforms energy access in Africa, helping millions achieve basic electricity by 2024.

With innovation in technology and falling costs, over 560 million people are already benefiting from off-grid solar, the majority of whom live in sub-Saharan Africa.
