BoxPower's flagship SolarContainer is a fully integrated microgrid-in-a-box that combines solar PV, battery storage, and intelligent inverters, with optional backup generation.

It uses a secure, non-penetrating design that clamps firmly to the container's edges, keeping the roof intact while holding solar panels safely in place. This not only ...

A shipping container solar system is a modular, portable power station built inside a standard steel container. A Higher Wire system includes solar panels, a lithium iron phosphate ...

Mobile power stations can be created by equipping containers with solar panels, batteries, and inverters. These stations can be deployed for ...

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.

We are proud to partner with one of the leading providers of factory installed solar options for shipping containers. Learn more about the product and ...

ConSOL is a mobile, solar-powered generator. It runs on PV panels that extend from its container's roof. Energy is stored in Lithium or Gel batteries. As a self-contained, self ...
