What are the requirements for packaging a lithium battery?

*The outer packaging must be a strong rigid outer packaging that is capable of withstanding a 1.2 meter drop test without damage to the cells or batteries, without shifting that would allow battery-to-battery contact, and without release of the contents of the package. o For packages with lithium cells or batteries contained in equipment:

Are lithium phosphate batteries good for solar energy storage?

Lithium iron phosphate (LiFePO₄) batteries are popular for solar energy storage due to their long lifespan and excellent thermal stability. Part 8. Off-grid solar system packages with batteries Off-grid solar systems require specialized battery packaging that includes: Heavy-Duty Protective Casings - Shields against environmental hazards.

What are the shipping guides for lithium cells & batteries?

For the purposes of this document, the ways to describe and configure packages of lithium cells and batteries, including smaller cells and batteries, are divided between ten distinct, standalone shipping guides. The shipping guides are numbered Guide 01 - Guide 10.

Do I need a performance packaging for a lithium battery?

However, if the package contains no more than 2.5 kg of lithium metal cells or batteries, UN performance packaging is not required when the package displays both the Lithium Battery Mark and the Class 9 Lithium Battery label. See 173.185(c)(5)(i) for details. o Damaged, defective, or recalled lithium batteries are forbidden from air transport.
