What are aluminum curtain walls?

The aluminum systems are not only easy to transport but also straightforward to manufacture. Curtain walls --also known as glass facades and exterior glazing systems--convert previously unused spaces into energy assets,enhancing both aesthetics and functionality.

What is a photovoltaic curtain wall?

They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. This reduces monthly electricity bills and ultimately pays for itself over time.

What is a curtain wall?

Curtain walling refers to a non-structural cladding system made from fabricated aluminum,commonly used on the outer walls of tall multi-storey buildings. This lightweight material offers ease of installation and can be customized to be glazed,opaque,or equipped with infill panels.

Does Photovoltaic Glass fit in a curtain wall?

No,the BIPV photovoltaic glass structurally does not differ from other types of conventional glazing. Therefore,it is integrated into the building envelope (curtain wall,facade,or skylight) like any construction material. What solar control and comfort advantages does photovoltaic glass offer in a curtain wall?
