To perform photosynthesis efficiently, they need to collect light across the entire solar spectrum, dynamically and promptly adapting their light-harvesting apparatuses to harvest more ...

Researchers at the Julius-Maximilians-Universit&#228;t (JMU) in W&#252;rzburg, Germany, have designed a novel light-harvesting system that ...

Researchers in Germany have developed a groundbreaking new light-harvesting system that could drive a huge leap in solar cell efficiency by absorbing light across the entire ...

In order to convert sunlight into electricity or other forms of energy as efficiently as possible, the very first step is an efficient light-harvesting system. Ideally, this should be panchromatic, i.e. ...

In order to convert sunlight into electricity or other forms of energy as efficiently as possible, the very first step is an efficient light-harvesting system. Ideally, this should be ...

Researchers are reporting progress on the road to more efficient utilization of solar energy: They have developed an innovative light-harvesting system.

In a groundbreaking development, researchers at Julius-Maximilians-Universit&#228;t (JMU) W&#252;rzburg have unveiled a pioneering light-harvesting system that promises to reshape ...

W&#252;rzburg researchers from the Bavarian initiative Solar Technologies Go Hybrid are reporting progress on the road to more efficient utilisation of solar energy: they have ...
