How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.

How do I get a solar quote?

Get accurate technical specifications and request a quote for each product. Get competitive quotes from trusted local and national solar companies. SolarCompare is an online platform helping homeowners purchase solar power, compare solar panels, and choose vetted installers.

How much does solar cost per watt?

The industry standard measurement for comparing solar costs is price per watt (\$/W). According to the National Renewable Energy Laboratory's Spring 2025 Solar Industry Update, residential solar costs average around \$2.56 per watt before incentives, with most systems ranging from \$2.56 to \$3.03 per watt. Factors affecting cost per watt include:
