Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

Which companies are combining Bess with solar power in Romania?

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names.

How long will a battery energy storage system last in Romania?

It is about to start building the BESS in Scornicesti in Olt county, west of Bucharest. R.Power is planning to complete it in a year. The battery energy storage system would have a duration of two hours, translating to 254 MWh in capacity. The project received funding from the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR).

What is solarplaza summit Romania PV & storage 2025?

As Romania continues to develop its renewable energy sector, the Solarplaza Summit Romania PV & Storage 2025 is the ideal platform for those looking to advance their business in this burgeoning market. Whether you are a developer, investor, or service provider, this event offers the insights, strategies, and connections necessary to succeed.
