The environmental performances of the photovoltaic electricity production in Italy by current and future Italian PV scenario were assessed applying Life Cycle Assessment ...

Italy installed around 2,33 GW of new PV systems in the first half of this year, according to new statistics released by Italian ...

Overview Concentrated solar power Solar potential Photovoltaics Energy policies Early developments Italy currently maintains various concentrated solar power (CSP) projects. Concentrated solar power plants concentrate solar energy into single points of collection with, for instance, mirrors, to maximise energy capture. Four types of CSP technologies are currently available on the market. These include parabolic troughs, Fresnel mirrors, power towers, and solar dish collectors. The 15 MWt Archimede solar field is a thermal field at Priolo Gargallo near Syracuse. The plant was inaug...

The entire nation of Italy retains high potential for solar energy production, ranging from 3.6 kWh per square meter per day in the Po river plain to 5.4 kWh per square meter per day in Sicily.

In general, Italy lacks a clear roadmap for the development of solar capacity. Financial incentives include tax deductions for PV system purchases and investment subsidies at regional levels, ...

Italy installed around 2,33 GW of new PV systems in the first half of this year, according to new statistics released by Italian renewables association Anie Rinnovabili based ...

Find the most up-to-date statistics about the solar photovoltaic industry in Italy

AleaSoft Energy Forecasting's latest analysis finds Germany broke its record for solar production on a day in December on Christmas Day, reaching 87 GWh, while Italy and ...
