Who owns a solar farm in South Sudan?

The solar farm will have an attached battery energy storage system rated at 35MWh. The off-taker is the South Sudanese Ministry of Electricity, Dams, Irrigation and Water Resources, represented by South Sudan Electricity Corporation, the national electric utility parastatal company.

How much does a power station cost in South Sudan?

This power station is an attempt to (a) diversify the country's generation mix (b) increase the country's generation capacity and (c) increase the number of South Sudan's homes, businesses and industries connected to the national grid. The power station is reported to cost an estimated US\$45 million to construct.

How much electricity does South Sudan have?

In March 2020, South Sudan's installed generation capacity was reported as approximately 130 MW. Most of the electricity in the country is concentrated in Juba the capital and in the regional centers of Malakal and Wau. At that time the demand for electricity in the country was estimated at over 300 MW and growing.

The 20MW solar facility is capable of supplying power to approximately 16,000 households in Juba, offering a significant reduction in energy prices and enhancing grid stability.

There are plans to build new generation stations and to import electricity from neighboring Ethiopia, Sudan and Uganda, but the civil war has hindered progress in that direction.
