---

Can you get solar power in St George?

Access to sustainable, maintenance-free solar energy is now available to St. George residents through SunSmart. City of St. George Energy Services Department and Dixie Escalante Electric have built a large solar photovoltaic (PV) facility allowing residents to get solar power through SunSmart, a community solar farm.

How will energy storage impact New York?

Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2040. Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage. All of this while creating an industry that could employ at least 30,000 New Yorkers by 2030.

What are New York state's energy storage goals?

Learn more about installed energy storage projects and New York State's progress toward its energy storage goals. New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by 2025 and 3,000 MW by 2030.

Are energy storage projects safe in New York State?

New York State has some of the most rigorous safety standards for energy storage projects in the country, reinforced by independent nationally recognized experts to ensure full compliance.

City of St. George Energy Services Department and Dixie Escalante Electric have built a large solar photovoltaic (PV) facility allowing residents to get ...

Rezolv Energy has secured a grant from the European Union under the NextGenerationEU programme for the deployment of a Battery Energy Storage System ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

Energy Storage Is Powering New York's Clean Energy Transition  
Energy Storage Safety  
An Expanded Goal of 6 Gigawatts by 2030  
In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified some of the most aggressive energy and climate goals in the country, including 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's

Public Service Commission expanded the goal to 6,000 MW by 2030. St...See more on [nysersda.ny.gov](https://nysersda.ny.gov).

**St. George Energy Storage Power Station Project**

Explore how the St. George Energy Storage Power Station Project redefines grid stability and renewable energy integration. Discover its innovative design, environmental benefits, and the role of battery energy storage systems (BESS) in the future of energy.

Planning has been underway for months and this effort builds on the efforts of New Energy New York and the Upstate New York Energy Storage Engine. We are excited and looking forward to the project's completion.

Battery energy storage system Tehachapi Energy Storage Project, Tehachapi, California A battery energy storage system (BESS), battery storage power station, battery energy grid storage ...

**Summary:** Explore how the St. George Energy Storage Power Station Project redefines grid stability and renewable energy integration. Discover its innovative design, environmental ...

Planning has been underway for months and this effort builds on the efforts of New Energy New York and the Upstate New York Energy Storage Engine. We are excited and ...
