Primeo Energie will use our storage system to provide energy flexibility. The battery stores surplus electricity from renewable sources and feeds it back into the grid as needed. In this way, ...

Swissgrid sees battery storage as a key technology for the energy transition. It not only facilitates the integration of renewable energies, but also increases the flexibility of the ...

As we approach Q2 2025's bid deadline, one thing's clear: Switzerland isn't just buying storage systems--they're procuring grid resilience. The winners won't be those with the cheapest kWh ...

Based on current scientific knowledge, leading Swiss researchers consider that where large amounts of energy need to be stored for the medium to long-term, technologies ...

(CONNECT) With the launch of its high-tech energy storage device FlexGrid, Energy Vault has announced its official entry into the Swiss market. FlexGrid is a product for ...

So there you have it - Switzerland's energy storage landscape in 2025 isn't just about electrons in boxes. It's a wild ride of innovation where precision engineering meets ...

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it ...
