---

Using selenium, a non-metal element known for its photoconductive properties, Fritts created the world's first solar cell. He ...

In the 19th century, it was observed that the sunlight striking certain materials generates detectable electric current - the photoelectric effect. This discovery laid the foundation for solar ...

In 1767, Swiss scientist Horace de Saussure created the first solar collector--a series of glass boxes nested inside one another. When exposed to sunlight, the innermost box ...

1954 - David Chapin, Calvin Fuller and Gerald Pearson of Bell Labs are credited with the world's first photovoltaic cell (solar cell). It was the first device that converted sunlight into electrical ...

In 1767, Swiss scientist Horace de Saussure created the first solar collector--a series of glass boxes nested inside one another. When ...

It was not until 1888 that the first solar cell was actually built by Aleksandr Stoletov. His cell was based on the discovery of the outer photoelectric effect, which caused electrons to be emitted ...

In 1973, the University of Delaware was responsible for constructing the first solar building, named "Solar One." The system ran on a hybrid supply of solar thermal and solar PV ...

In 1973, the University of Delaware was responsible for ...
