Will Kyiv's energy storage system reach 27% by 2030?

Kyiv wants to up this to 27% by 2030. Other similar energy storage systems in Eastern Europe include Lithuanian electricity transmission system operator Litgrid's 200-MW units launched in 2023 and a 55-MW battery energy storage system in Razlog in southwestern Bulgaria that went online in 2024.

Who is funding the energy storage project in Ukraine?

Ukraine's second most profitable bank, state-owned Oschadbank, state-owned Ukrgasbank, and PUMB will provide the funding for the project, which includes six energy storage installations across the country, totaling 200 megawatts to power 600,000 households.

Is DTEK the largest private investment in Ukraine's energy sector?

It marked the largest ever private investment in Ukraine's energy sector. Unlike other state-owned energy companies in Ukraine, DTEK hasn't been able to secure funding from the European Bank for Reconstruction and Development (EBRD).

Although Kyiv has extremely limited potential for installing solar power plants due to the dense urban development, the demand for solar power plants is growing.

"DTEK's investments in new energy capacity are not only a response to current challenges but also a contribution to the long-term strategy of ...

A report by the International Energy Agency (IEA) recommends three strategies to accelerate the deployment of distributed solar and battery energy storage systems (BESS) in ...

The Kyiv City Council approved the installation of solar panels and energy storage systems in public government buildings and housing ...

Strong storage systems will enable broader utilization of solar energy and reduce energy price fluctuations. The KNESS project, in which Oschadbank participates, is one of the ...

The Kyiv City Council approved the installation of solar panels and energy storage systems in public government buildings and housing to provide backup power during ...
