---

From 2025-2030, our base case outlook puts total solar deployments at 246 GWdc - virtually unchanged from our Q3 2025 outlook.

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

Global annual investment in solar PV and other generation technologies, 2021-2024 - Chart and data by the International Energy Agency.

Solar PV investment surged in 2024, comprising 45% of power generation funding and is expected to maintain dominance for the next decade.

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government ...

Global energy spending is set to surpass \$3 trillion for the first time this year. The International Energy Agency (IEA) projects that investment in solar photovoltaics will exceed ...

While multiple renewable energy technologies are available, the last decade has seen solar grow from 1% share in the total Renewable Energy generation to 13% of total ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business ...
