Constructed entirely using Chinese standards, technologies and equipment, the production line will produce 130,000 square meters of high-quality solar glass daily once ...

The new line will produce high-quality #glass with high transmittance performance for photovoltaic (PV) panel manufacturers. It will have an annual capacity of 47 million m².

Looking for comprehensive market research on the solar glass sector in Turkey? This blog post explores market trends and opportunities, backed by reliable data.

Low iron, patterned glass that come in Sandy and Prism patterns reduce reflections on the glass surface and provide maximum efficiency in terms ...

On June 25, 2024, in local Turkish time, the 300-ton-per-day ultra-clear float glass production line at Duzce Cam in Turkey, constructed by China National Building Materials International ...

Constructed entirely using Chinese standards, technologies and equipment, the production line will be able to produce 130,000 square meters of high-quality PV glass daily ...

With this new production line in full operation, Duzce Cam not only enhances its capacity to produce high-quality solar glass but also contributes to the local economy and the ...

Key trends include innovations in glass technology, heightened installation of solar projects, and a surging demand for eco-friendly energy solutions. Growth is driven by supportive government ...
