I joined UBC Solar in my first year and learned so much more than I could have imagined. On PAS, we focus on both high-voltage and low-voltage systems, including the solar arrays, the ...

Our multidisciplinary research team works collaboratively to advance our understanding of harnessing, converting, storing and using solar energy with the aim to accelerate vast ...

UBC Solar is a student-run solar vehicle team that competes at international competitions. The team is located at the University of British Columbia in Vancouver, Canada.

To significantly increase the potential application of photovoltaic (solar electric) systems as a practical, sustainable, energy option, this study has focused on the control and power ...

UBC Solar is a student-run solar vehicle team that competes at international competitions. The team is located at the University of British Columbia in ...

UBC is committed to harnessing the sun's power to create a sustainable and eco-friendly future. Our solar energy solutions are designed to provide efficient and reliable power and adhere to ...

From solar facilities and wind farms to hydrogen plants, UBC renewable installers can be found all across North America performing mission critical work in virtually every sector of the ...

Located on the rooftop level of Thunderbird Parkade, the array will harness the sun's energy, and the electricity produced will charge electric vehicles, create hydrogen, charge a large ...
