How many energy storage projects are there in Victoria?

773 MW of commissioned energy storage capacity and 21 utility-scale storage projects with a combined capacity of 2,326 MW under construction or undergoing commissioning at 30 June 2025. Figure 4: Emissions from electricity generation in Victoria, 2013/14 to 2024/25

How many large-scale storage systems does Victoria have?

Victoria has 12 commissioned large-scale storage systems and 3 in commissioning - with a total output capacity of 1028 MW and storage capacity of more than 1.7 GWh. Storage capacity = how much total energy is stored in each battery. Output capacity = how much energy a battery can provide at a given time.

When will Victoria's new solar power plant be built?

Building works commenced in early 2024, with commissioning targeted in late 2026. Once in operation, the facility will deliver grid forming and stability services within Victoria's South West Renewable Energy Zone.

Why is Victoria a good place to store batteries?

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity. Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient.

Chinese solar giant Trina Solar has lodged plans to build a 1 GWh battery energy storage system in Victoria as part of a broader strategy that aims to deliver more than 6.5 GW ...

Energy Vault Holdings, Inc., a leader in sustainable, grid-scale energy storage solutions, has announced the start of construction of a 200 MW/2 hour battery energy storage ...

The Victoria and South Australia tender was seeking bids for energy generation and storage projects with up to 600 MW / 2,400 MWh of dispatchable capacity that will be ...

Alongside the advancement of Pacific Green's Portland Energy Park, Australian renewables developer Edify Energy has secured ...
