Back in 2022, Eco Wave Energy announced plans to relocate its wave energy array from Gibraltar to the Port of Los Angeles. Now the company has secured final approval ...

An onshore wave energy site, a pilot by Eco Wave Power, at the Port of Los Angeles" AltaSea ocean institute, operates on Thursday, Sept. 4, 2025, in Los Angeles.

The first wave energy project in the U.S. is coming to the port of LA. Here's how it works. Unlike wind and solar, ocean waves are a potential source of always-on power.

Learn how Wave Energy Converters can transform ocean waves into electricity, paving the way for sustainable energy solutions.

Wave power is at a much lower level of technical development compared to solar PV, onshore wind, offshore fixed wind, and offshore floating wind, all of which will capture most near-term ...

The first wave energy project in the U.S. is coming to the port of LA. Here's how it works. Unlike wind and solar, ocean waves are a ...

A company called Eco Wave Power has installed the first working wave power generator in the United States. It will act as a pilot ...

This paper introduces a novel wave energy device incorporating a wave roller, based on the classical direct float linear generator structure, with optimizations made to its key ...
