Why is energy storage a problem?

The lack of direct support for energy storage from governments, the non-announcement of confirmed needs for storage through official government sources, and the existence of incomplete and unclear processes in licensing also hurt attracting investors in the field of storage (Ugarte et al.).

Why is non-acceptance of energy storage systems a problem?

Non-acceptance of EES systems by the industry can be a significant obstacle to the development and prevalence of the utilization of these systems. To generate investment in energy storage systems, extensive cooperation between facility and technology owners, utilities, investors, project developers, and insurers is required.

Why are investors not able to invest in energy storage?

But currently, the running programs and unbalanced pricing in the market, the lack of certainty and certainty in regulatory affairs and the economy, are challenges that prevent investors from entering the field of energy storage (Castagneto Gissey et al., 2018).

How can energy storage systems be improved?

By creating the necessary standards and appropriate classifications, research activities in improving storage systems are improved and all these factors can speed up the production and commercialization of energy storage devices and systems (Olabi et al., 2021, Castagneto Gissey et al., 2018). 6.4. Market and regulatory barriers
