Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

Is Growatt a good microinverter?

Pricing is similar to other microinverters we've seen. Growatt is the best hybrid inverter we found during our search. It's available in a variety of sizes and comes with a fair warranty and efficiency ratings. It's also cheaper than other inverters, which is surprising because hybrid inverters tend to be more expensive.

How much does an inverter cost?

Medium Residential Systems (6-10 kW): You'll likely need an inverter between 6 and 10 kW, with costs between \$1,800 and \$3,500. Large Residential/Small Commercial Systems (10+kW): These require inverters 10 kW and above, with prices starting around \$3,000 and going up significantly depending on the specific application.

How much does a 10kW inverter cost?

For example, an entry-level 5kW inverter can start at as little as \$650, while a premium quality 10kW inverter with a 10-year warranty may cost up to \$2400. However, considering the higher failure rates of many low-cost inverters and the difficulty of claiming warranties, we recommend investing in a higher-quality unit.

Here's a breakdown of typical price ranges, keeping in mind that these are estimates and actual prices can vary based on specific models, features, and installation costs.

The latest 2025 solar inverter prices by top brands like Huawei, Growatt, SMA, RENYUAN, and DEYE. Compare models, features, and global trends to make the best choice ...
