The system uses compressed air storage in ancient salt domes 450 meters below Basseterre. During peak solar hours, excess energy compresses air into these natural reservoirs.

The project involves the installation of two (2) energy storage battery plants, totaling 1MW storage capacity, on concrete foundation pads with shade structures.

The project, set on government-provided land in the Basseterre Valley, will include a 35.6 MW solar energy plant along with a 44.2 MWh battery storage facility.

The solar energy plant and the megawatt-hour battery storage facility will be built on 100 acres of crown land located in the Royal Basseterre Valley National Park utilizing a lease agreement. ???

Welcome to Basseterre's energy revolution - where new energy and energy storage solutions aren't just tech jargon, but the secret sauce keeping the lights on during hurricane ...

The 35.6MW solar energy plant and 44.2MWh battery storage facility is being built in the Basseterre Valley on the island of St. Kitts. SKELEC, St. Kitts electricity utility, is able to make ...

The project, which will include a 35.6 MW solar energy plant and a 44.2MWh battery storage facility, is planned to be constructed on a site provided by the government in the Basseterre ...

That's the story unfolding in Basseterre, where the energy storage industry is rewriting the rules of power reliability. With a global energy storage market valued at \$33 ...
