What is a container data center?

Container data centers offer a flexible solution to rapid growth and expanding needs. Your entire mobile data center can be installed, run, and managed out of a shipping container environment that is ideal for: The modern information technology infrastructure is changing just as rapidly as technology itself.

What is a mobile container data center?

Mobile container data centers are compact and take up far less space than traditional buildings no matter the location. Kstar data center containers are built and tested in the factory. All subsystems, such as UPS, power distribution, battery, cooling, racks and more, are well integrated, which enables quick construction.

What is a modular containerized solution?

Data centers are the backbone of modern IT infrastructure, and modular containerized solutions are transforming the way they are designed, deployed, and operated.

Is building a data center more expensive than colocation?

Actual data center costs can vary greatly from this model; the primary value of this tool is to evaluate how each cost input affects the lifetime cost differences between the two approaches. After 10 years, building is 12.7% less expensive than colocation with a break-even at &lt; 6 years. Blog: Cloud vs. Colocation - Which is Best for Your Business?
