NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

Elevate Renewables has completed contracting to construct a state-of-the-art battery storage facility to store power during non-peak hours and discharge power during peak ...

A Texas project captures surplus energy from high wind periods, distributing it during low production, optimizing energy management. These successes underscore battery ...

The Brownsville energy storage system, which will be located next to our substation in the Brownsville neighborhood of Brooklyn, will further our clean-energy goals by storing 5.8 MW of ...

Wind energy storage solutions are vital for optimizing energy use, but which methods truly maximize efficiency and reliability? Discover the top technologies now.

ArcLight Capital Partners and Elevate Renewables, a battery storage developer, have announced a milestone battery storage infrastructure project at the Arthur Kill Power ...

Elevate's battery energy storage systems (BESS) will assist the integration of large amounts of offshore wind and other intermittent resources, provide grid-supporting services, redefine grid ...

Solar and wind power are planned to develop in tandem with battery storage so excess energy can be saved while nature provides wind or sun. Battery storage is meant to ...
