It's one of just a handful of sites in India powered by electricity stored in batteries, a key component to fast-tracking India's energy transition away ...

From portable units to large-scale structures, these self-contained systems offer customizable solutions for generating and storing ...

Storage isn't just technology--it's the backbone of a flexible, resilient power system that can handle peak loads and make every unit of clean energy count. To support this, the Ministry of ...

Solar farms line the deserts of Rajasthan, onshore wind turbines sweep across Tamil Nadu, and rooftop panels glitter above ...

The brand new self-sustainable Containerized Solar PV Solution by Statcon Energiaa provides a ready-made alternative for the common problem of ...

The system integrates solar panels positioned atop the container, boasting a power capacity range of 4 to 8 kWp, complemented by a reliable battery ...

India added more than 40 GW of solar and wind capacity in 2025, while grid constraints, power contracting delays, and supply chain risks continued to affect project ...

The system integrates solar panels positioned atop the container, boasting a power capacity range of 4 to 8 kWp, complemented by a reliable battery backup system.
