We are happy to announce that our first investment in new renewable energy, an innovative solar plus battery storage project in Kern County, is now producing power.

With the establishment of a large number of clean energy power stations nationwide, there is an urgent need to establish long-duration energy storage stations to absorb the excess electricity ...

The limitations of traditional grid power, such as capacity constraints, lack of transmission infrastructure in remote areas, and the increasing electricity demand, have pushed many ...

n's substantial BESS segment. The region has the largest share of power storage projects within our KPD, with a total of 453 BESS projects, seven CAES projects and two thermal energy ...

The Yaounde's grid-side energy storage project aims to change this narrative through its 52MWh lithium-ion battery array - but is this just a Band-Aid solution or a real game-changer?

Calcium Looping (CaL) process used as thermochemical energy storage system in concentrating solar plants has been extensively investigated in the last decade and the first large-scale pilot ...

We are committed to excellence in solar power plants and energy storage solutions. With complete control over our manufacturing process, we ensure the highest quality standards in ...

New energy storage project in Kiev DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites ...
